JUL -2 1999 6555 '99 JUL -6 P1:42

The Honorable Paul E. Kanjorski
House of Representatives
Washington, D.C. 20515-3811

Dear Mr. Kanjorski:

Thank you for your letter of June 11, 1999 on behalf of Ms. Laura Blain of Ulster, Pennsylvania, concerning actions by the Food and Drug Administration (FDA or the Agency) in regard to labeling of foods treated with ionizing radiation.

The 1997 FDA Modernization Act (PL 105-115) states that "[n]o provision . . . shall be construed to require on the label or labeling of a food a separate radiation disclosure statement that is more prominent than the declaration of ingredients" FDA published a final rule implementing this provision of the law in the Federal Register of August 17, 1998. A copy of this regulation, along with the pre-existing labeling requirements for food treated with ionizing radiation (21 CFR 179), are enclosed for your information.

In addition, the Statement of Managers accompanying the FDA Modernization Act directed FDA to publish for public comment further proposed changes to the Agency's current labeling regulations. The managers stated their intention that any required labeling be of a type and character such that it would not be perceived to be a warning or give rise to inappropriate consumer anxiety. On February 17, 1999, FDA published an Advance Notice of Proposed Rulemaking (ANPR) in the Federal Register soliciting public comment on whether additional revisions to the current irradiation labeling requirements are needed and, if so, what form such revisions might take. The deadline for comments in response to the ANPR has been extended to July 19, 1999.

Page 2 - The Honorable Paul E. Kanjorski

We have forwarded Ms. Blain's correspondence to the Docket for inclusion in the record. FDA's final approach to labeling of irradiated foods will take into account all of the data and information received.

Because your constituent may be concerned about irradiation labeling for meat and poultry, you may also wish to contact the United States Department of Agriculture (USDA) for information. (USDA has primary regulatory authority over meat and poultry products, including the labeling of such products.)

We have also enclosed some general background on the issue of irradiation. We trust this responds to your concerns.

Sincerely,

for Melinda K. Plaisier
Interim Associate Commissioner
for Legislative Affairs

Dear Ms. Thompson:

I am forwarding the following letter from one of my constituents, Ms. Laura Blain. Please respond to her concerns to my Washington office consistent with applicable law and regulations.

Thank you in advance for your attention to this matter.

Sincerely,

Paul E. Kanjorski

ReDocket No. 98N-1038, Irradiation in the Production, Processing, and Handling of Food

To whom it may concern

I support the recommendation by the Center for Science in the Public Interest regarding labeling of irradiated foods

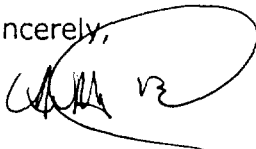

"any foods, or any foods containing ingredients that have been treated by irradiation, **should be labeled** with a written statement on the principal display panel indicating such treatment. The statement should be easy to read and placed in close proximity to the name of the food and accompanied by the international symbol. If the food is unpackaged, this information should be clearly displayed on a poster in plain view and adjacent to where the product is displayed for sale."

Like other labels, irradiation labels are required by the FDA to be truthful and not misleading. I believe that **the terms "treated with radiation" or "treated by irradiation" should be retained**. Any phrase involving the word "**pasteurization**" is **misleading** because pasteurization is an entirely different process of rapid heating and cooling.

I recognize the radura as information regarding a material fact of food processing. The requirement for irradiation disclosure (both label and radura) should not expire at any time in the future. The material fact of processing remains. Even if some consumers become familiar with the radura, new consumers (e.g., young people, immigrants) will not be. The symbol should be clearly understandable at the point of purchase for everyone. If there is no label, consumers will be misled into believing the food has not been irradiated.

I urge you to **extend the comment period** past its current end date of May 18 to allow more concerned citizens the time to write in about this issue. Also, **please place the comments received on the Internet so that the public can be informed about who is participating in this comment process**.

Sincerely,

A handwritten signature in black ink, appearing to read 'Laura Blain', enclosed within a large, hand-drawn oval.

Laura Blain
